DIESEL CARE

Diesel fuel additive, preventive treatment

USES

YACCO Diesel Care is specially formulated to prevent engine sludge, dirt and carbon build-up in all types of Diesel engines, including modern ones fitted with direct injection systems (Common Rail, pump injectors) and particulate filters. Used regularly, YACCO Diesel Care cleans and keeps clean the injection pump, injectors, combustion chambers, turbo and EGR valves. This maintains the vehicle to maximum efficiency and extends life of components.

MAIN CHARACTERISTICS

	Values
Aspect	Liquid
Colour	Yellow
Density at 20°C (kg/m ³)	890

The data given in this table are typical values from production and cannot be specifications in any case.

PROPERTIES & ADVANTAGES

- Prevents build-up of deposits inside all types of Diesel engines (incl. Common Rail, direct injection...)
- Compatible with particulate filters
- Helps reduce fuel consumption, CO₂ and polluting emissions
- Improved lubrication prevents pump and injectors wear
- Increases Cetane number for easier start-up and lowers engine noise
- Improves water dispersion and prevents its accumulation in the tank
- Helps reduce the tendency of Diesel to foam

DIRECTIONS

Treatment in the vehicle tank :

- 1 dose of 400 ml for a 40 to 60 L fuel tank
- Use regularly for maximum efficiency: once every 10 000 km is recommended

NB. For easy mixing of DIESEL CARE with the fuel, add preferably the product half way of the filling up.
