

L'huile des records du monde

GRAISSE SELLETTE

Fifth wheel grease

USES

Specially designated for the lubrication of fifth wheels of **heavy duty vehicles**.

Use in a moderate coating to optimize the performance.

Apply with a paint-brush, a spatula or a brush after having removed dirt and abrasive dusts.
(Do not clean up with solvents).

MAIN CHARACTERISTICS

	Typical values
Colour	Brown
Aspect	Smooth, adherent
Consistency (penetrability 60 strokes per 1/10mm)	310-340
Drop point	> 200°C
Thickener	Inorganic
Seizure load	> 500 kg

The data given in this table are typical values from production and cannot be specifications in any case.

PROPERTIES & ADVANTAGES

- Very high adherence
- The oil film absorbs the shocks and avoids any metal to metal contacts
- Excellent anti-wear, antirust and anti-seizing properties
- **Insoluble in water**

SPECIFICATION

N.L.G.I. : 1
ISO 6743-9 _ ISO-L-XAEHB 1
